

UF STUDY ABROAD BUDGET WORKSHEET

This worksheet is designed to help you envision what it may cost you to study abroad. The first page allows you to plug in costs that you would typically incur while studying at the University of Florida. The second page allows you to plug in costs you may incur while abroad. You will also see a final section that allows you to directly compare the difference in cost between spending a term at the University of Florida and spending that *same* term abroad.

PLEASE NOTE:

- Expenses strictly related to study abroad, that you would not incur at the University of Florida, have been highlighted in **red**.
- Blocks shaded in gray do not need to be filled in with any numerical/cost values.
- Some “Additional Expenses” are one-time expenses, while others are recurring. For those that would be recurring, it is recommended that you estimate the total amount you would spend during your entire time abroad.
